Features at a glance

- DATA ACCESS CONTROL real-time database security monitor that audits and inspects data streams, detecting and preventing inappropriate activity.
- ANALYZE AND RECOMMEND ActiveBase SQL Expert tunes problematic SQL statements by adding database 'Hints' and , identifying best execution alternatives.
- FIX ActiveKnowledge automatically intercepts and corrects problematic SQL statements in real-time, ontheir way to the databases, using database 'Hints' and SQL rewrites.

It applies Oracle Hints and rewrites on SQL statements without intrusively recoding applications or manually rewriting reports and ad-hoc queries.

ActiveKnowledge also selectively blocks or postpones unauthorized or offensive reports or run-away queries, returning customized message to the applications.

ActiveKnowledge intercepts application requests and fixes them

Specifications

- Supports all applications using Oracle database 7.3 or higher, on all major platforms
- Installation platforms: Windows, Solaris, HP-UX, Linux

ActiveKnowledge[™]

Business Intelligence Performance Management

ActiveBase provides companies with immediate visibility into their business operations by delivering a real-time infrastructure to power and secure Data Warehouse and Reporting environments.

ActiveBase applies performance acceleration and security policies in real-time on incoming requests to provide lightning-fast response time, dramatically improving performance and scalability. It is easy-to-deploy and transparent to end users, applications and databases.

Results

- IMPROVE RESPONSE TIME of statements up to x50, by automatically applying SQL optimizations in real-time, without recoding.
- INCREASE CAPACITY AND STABILITY, by improving or blocking unauthorized and offensive run-away queries.
- CONTROL AND ENFORCE security policies, database access and application usage.
- FULL USAGE TRACKING
